

Supplementary Figure 8 | Methylome-FIRE relationship is compartment-scale and developmentally co-dynamic

(a) Genome-wide co-localisation
Spearman $\rho = 0.32$ (= core/arm contrast)

(b) No within-compartment resolution
(all $p > 0.1$, 5–100 kb)

(c) Developmental co-change
Spearman $\rho = 0.43$ ($p = 1e-77$)
