

# Nucleoid-Associated Protein Expression Dynamics

*S. coelicolor* M145 | T1 → T2 → T3

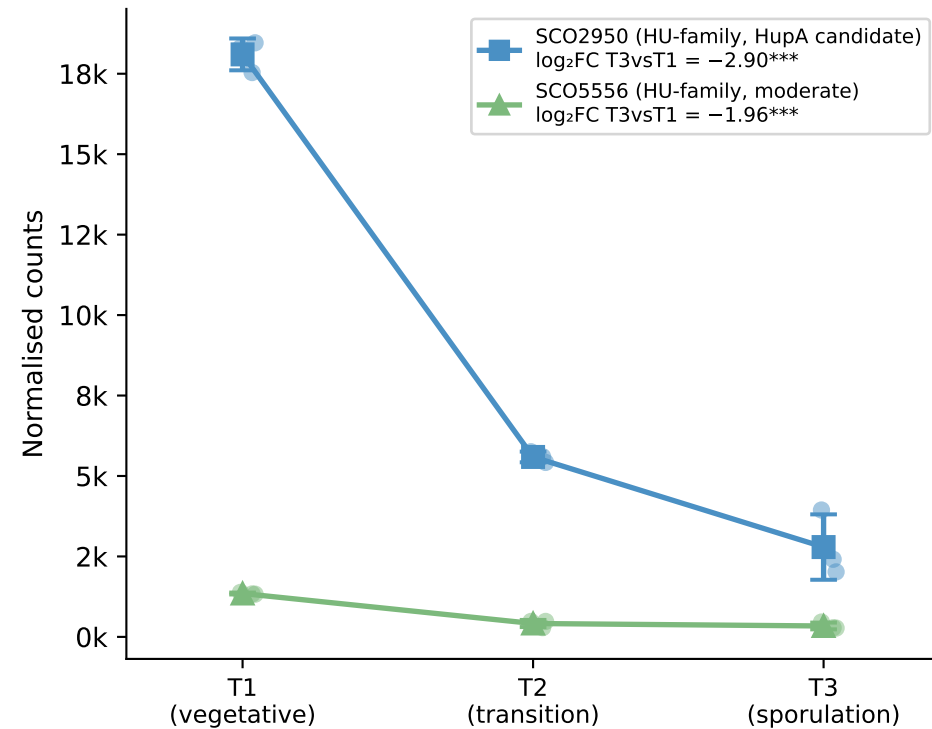

**A**

HupS (SCO1175 / SC\_RS07825)  
Sporulation-induced

**B**

HU-family NAPs (constitutive)  
SCO2950 & SCO5556

\*  $p < 0.05$  \*\*  $p < 0.01$  \*\*\*  $p < 0.001$  ns = not significant (DESeq2 Wald test, BH-adjusted)

Note: SCO4950 in current RefSeq annotation = narI (nitrate reductase  $\gamma$ -subunit). SCO2950 shown as HupA candidate based on expression profile and HU-family annotation.
