

a REBASE conservation

b Motif O/E in M145 genome

c SC_RS17645 (SCO3104)

Candidate N-6 adenine methyltransferase

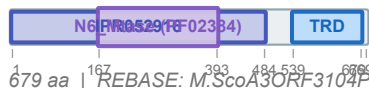

AAGCCCG = N-6-methyladenine motif

Requires N-6 adenine MTase

22 MTase genes in M145 genome

Only 1 annotated as "N-6 DNA methylase"

SC_RS17645: HsdM (Type I R-M) with TRD domain

d MTase expression vs AAGCCCG methylation
